

COMMUNICATE EFFECTIVELY TODAY WITH SITE2 **hostedexchange**

Why spend weeks and months to get your email up and running when in a day Site2 can have you communicating. Does it really make sense to run your own email servers? The costs of hardware, software licenses and maintenance can really add up!

Site2 knows Email is a core business application for all businesses these days - without it your business can come to a standstill. Having an environment that is not only resilient but easily accessible is key.

Site2's Hosted Email service leverages the Microsoft Exchange Server 2010 Enterprise Edition platform allowing three ways to get your emails – via Outlook, via SmartPhone and via the Web. For the heavily regulated industries, Site2 also provides email archiving and e-Discovery for historical reference and compliance.

Features of Hosted Microsoft Exchange

Anytime, Anywhere Access

Site2's Hosted Microsoft Exchange helps satisfy the needs of today's highly mobile business person. Access emails from anywhere at any time on your computer's Outlook, via SmartPhones and on the Web. Whether you are at the office, at home, or on the road at a partner or client visit you will always have access to your email, calendar and contacts.

Productivity

Site2's Hosted Exchange allows employees to collaborate efficiently on work projects through the ability to share calendars, tasks and important contacts. Communicating notes and files on the included shared folders helps to promote effective team work.

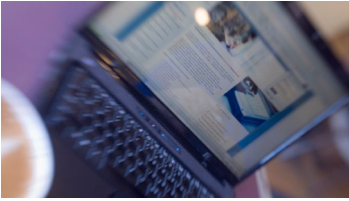

Archiving

Our compliance archiving will store emails to meet your company regulatory and audit retention rules. Email archiving will help support your company's proactive email review procedures, and help save the company costly fines and penalties.

Support

Site2 provides live 24/7 phone and email support, ensuring you have a partner that is there for you through virtually any email challenge.

Site2's Hosted exchange service allows you to enjoy the Enterprise features found in Microsoft Exchange Server 2010. Please review the Hosted Microsoft Exchange plans below. If you are interested in learning more, please call 877-SITE-TWO (748-3896) or email Sales@site2bc.com.
